

cell guard case

radiation protection perfected

Description

Electromagnetic radiation (EMR) emitted by cell phones/ smart phones has been linked to various stress-induced health issues. We subject ourselves to this overbearing external stressor every day. The GIA Cell Guard Case allows you to use your smart phone with the peace of mind you deserve. The GIA Cell Guard Case actively works to neutralize the effects of your exposure to harmful radiation, while supporting the body's resilience to stress at the same time.

Cases Available for...

 - X / Xs / Xs Max / XR
 - 11 / 11 Pro / 11 Max
- Samsung Galaxy
 - S7 / S7 Edge
 - S8 / S8 Plus
 - S9 / S9 Plus
 - S10 / S10 Plus / S10 Edge
 - Note 8
 - Note 9
 - Note 10 / Note 10 Plus

Available In

- Black
- Silver
- Rose Gold
- White (most models)

Technology Used

- Molecular Resonance Effect Technology (MRET)
- Energy Resonance Technology (ERT)

Lifespan

- 2 years

How to use

- Insert top of phone into GIA Cell Guard Case carefully aligning buttons and controls

Product Highlights

- Military Standard Drop Test Certified
- Full protection, care for your phone
- Soft and hard combination to better protect your phone
- Engineered to emphasize thinness without compromising phone security
- Impact-resistant layers
- Convenient and affordable

cell guard case - FAQ

How do I apply the Cell Guard Case?

Insert the top of your phone into the GIA Cell Guard Case, while carefully aligning buttons and controls. With the top of your phone aligned, press the bottom of your phone firmly into the Cell Guard Case.

Can I move my Cell Guard Case from one cell phone to another?

GIA does NOT recommend moving a Cell Guard Case from one phone to another - unless the new phone is the exact same make and model of the original phone. Different phones emit and receive different frequency ranges, requiring their own Cell Guard Case.

What is the lifespan of my Cell Guard Case?

The patented polymer inside the Cell Guard Case has a lifespan of 2 years, after which it should be replaced with a new Cell Guard Case.

Will the Cell Guard Case affect the signal strength of my phone?

The Cell Guard case has been designed to neutralize the effects of your exposure to EMR, while leaving the signal strength and clarity of your phone unaffected.

Is the Cell Guard Case water and heat resistant?

Generally speaking, Cell Guard Cases are water and heat resistant. However, it's safe to say that if your Cell Guard Case is actually submerged in water or catches fire, you'll need to replace it.

What's the difference between the Cell Guard Case and the GIA Cell Guard Classic or Sliver?

Besides the differences in size and shape between the three Cell Guard varieties, the amount of patented polymer used in the GIA Cell Guard Case is different than in the Cell Guard Classic and/or Sliver. Also, the Cell Guard Case is designed to cover the entire (rear and side) surface area of your phone.

If I use the GIA Hands-Free Airtime Headset, do I still need to put a Cell Guard Case on my phone?

Yes, we still recommend you use the Cell Guard Case on your cell phone. The best way to address EMR emitted from your cell phone while experiencing hands-free convenience is to use the Cell Guard Case and the GIA Hands-Free Headset together.
