

motion+

dietary joint health formula

Description

Studies by the Center for Disease Control and Prevention show that in the U.S. alone, an estimated 50 million adults have been diagnosed with some form of arthritis or other joint related issues. That number is predicted to rise by more than 30% in the next 20 years. Millions more struggle with joint stiffness at some point in their lives. Motion+ (Motion Plus) is a daily, dietary supplement containing a unique liquid blend of three powerful key ingredients: Glucosamine, MSM, and Cetyl Myristoleate - all of them renowned for their joint support qualities.

Key Ingredients

- Cetyl Myristoleate
 - A groundbreaking ingredient discovered by a researcher at the National Institute of Arthritis, Metabolic, and Digestive Diseases, who found that mice were seemingly immune to arthritis because of high levels of Cetyl Myristoleate. Clinical research has since confirmed the success of Cetyl Myristoleate, making it a highly sought after joint support ingredient
- Glucosamine
 - An amino acid that is naturally produced in the body, and a precursor to a molecule used in the formation and repair of cartilage
- Methylsulfonylmethane (MSM)
 - MSM is a natural sulfur compound that experts call "a necessary building block for proteins", in particular for connective joint tissue

Available In

- 1.2 oz Bottle (single)
- 4 pack (1.2 oz Bottles)

Technology Used

- Single File Alignment (SFA)

How to Use

- For use as a dietary supplement, take 1 mL (9 sprays orally, under the tongue) daily, following a meal
- If desired, dosage may be divided between morning (5 sprays) and evening (4 sprays)

Product Highlights

- Refreshing mint-flavored taste
- Single-File Aligned (SFA)
- Approximately 30 servings per container
- Motion+ users have reported increased range of motion and discomfort relief in previous areas of pain
