AVAILABLE IN

Classic (Single)	(#39215)
Classic (4 Pack)	(#39214)
Sliver (Single)	(#39212)
Sliver (4 Pack)	(#39213)

FEATURES*

- Proprietary GIAPlex dual-action technology, designed to neutralize the effects of electropollution exposure, as well as reinforce your body's natural resilience to it.
- Effective on Cell Phones, Smart Phones, Bluetooth & PDAs
- Convenient and affordable
- No maintenance required

CELL GUARD™

FOR MOBILE PHONES, SMART PHONES & BLUETOOTH DEVICES

Electromagnetic radiation (EMR) emitted by cell phones, PDA's, Bluetooth headsets, etc. has been linked to various stress-induced health issues. We subject ourselves to this overbearing external stressor every day. The GIA Cell Guard allows you to use your cell phone, smart phone, Bluetooth or PDA with the peace of mind you deserve. Utilizing the proprietary GIAPlex technology, the GIA Cell Guard actively works to neutralize the effects of your exposure to harmful radiation, while supporting the body's resilience to stress at the same time.*

GIAPlex™ combines the benefits of the patented noise field technology MRET™ (Molecular Resonance Effect Technology), and GIA's proprietary subtle energy technology ERT™ (Energy Resonance Technology). The combination of these two groundbreaking technologies offers an effective way to deal with the cumulative stress associated with living in today's electronic and wireless environment.*

*"For the last 10 years I have used a Cell Phone between 30 and 60 hours per week for business. During the last several years I've noticed an increase in tension in my neck and shoulder area. I also suffered with a nagging discomfort in my right ear whenever I used my phone. Once I discovered the GIA Cell Guard those problems disappeared."**

J.W., Dana Point, CA

CELL GUARD™

FOR MOBILE PHONES, SMART PHONES & BLUETOOTH DEVICES

FREQUENTLY ASKED QUESTIONS*

How do I apply the Cell Guard?

For best adhesion, make sure the phone's surface is clean. Apply the Cell Guard to a dry, flat surface.

What if I have a case on my phone?

If you have a case on your phone, apply the Cell Guard directly to the case. DO NOT cover the Cell Guard with a case.

Can I move my Cell Guard from one cell phone to another?

GIA does NOT recommend moving a Cell Guard from one phone to another - unless the new phone is the exact same make and model of the original phone. Different phones emit and receive different frequency ranges, therefore the Cell Guard should not be transferred.

What is the lifespan of my Cell Guard?

The patented polymer inside the original Cell Guard has a lifespan of three years and the Cell Guard Sliver has a lifespan of 1 year - each should be replaced with a new Cell Guard accordingly.

Will the Cell Guard affect the signal strength of my phone?

The Cell Guard has been designed to neutralize the effects of your exposure to EMR, while leaving the signal strength and clarity of your cell phone unaffected.

Is the Cell Guard water and heat resistant?

Generally speaking, Cell Guards are water and heat resistant. However, it's safe to say that if your Cell Guard is actually submerged in water or catches fire, you'll need to replace it.

What's the difference between the Cell Guard and the GIA Universal Guard™?

There are a few key differences between the two. The amount of patented polymer used in the Universal Guard is different than in the Cell Guard, as it is designed to be used on larger electronic devices. Their individual shapes and packaging are different as well.

If I use the GIA Hands-Free Airtube Headset™, do I still need to put a Cell Guard on my phone?

Yes, we still recommend you use the Cell Guard on your Cell Phone. The best way to address EMR emitted from your Cell Phone while experiencing hands-free convenience is to use the Cell Guard and the GIA Hands-Free Headset together.

FEEDBACK & SUCCESS STORIES*

"When I was introduced to the GIA Cell Guard, I was skeptical regarding its validity. However, after putting the Cell Guard on my Cell Phone, I no longer get a hot ear after continued Cell Phone use and I feel less stressed!"

J.L., San Diego, CA

"For months, I had felt a drilling discomfort in my shoulder that neither chiropractic nor massage could ease. After just a few days of having the GIA Cell Guard on my Cell Phone I woke up one morning to discover my discomfort was gone! Completely gone! Over the next several days I noticed that I was bouncing out of bed quicker and had more energy all day long, more than I had for quite some time. Many people commented on how energetic I was. My thanks to the entire GIA Wellness team for bringing such a wonderful product and opportunity into my life!"
