FLEXCORE TECHNOLOGY

We have isolated the ERT-charged components that make each GIA4Life Pendant so energetically beneficial and built them into a self-contained, transferable “FlexCore” insert. Within seconds, the insert can be wound into any one of three outer pendant designs using a custom-designed key. You now literally hold the key to your bioenergetic wellness - with truly groundbreaking flexibility and style!*

ERT TECHNOLOGY

By energetically entraining its groundbreaking “Inspired Energy” products with the proprietary Energy Resonance Technology (ERT), GIA Wellness has revolutionized the way biofield-reinforcing frequencies are utilized by the body. Through ERT, the body’s natural biofield strength is optimized to a level where you can truly thrive energetically, even in the most stressful environments.*
