

NEW HARMONIZER™

THRIVE IN TODAY'S ELECTROPOLLUTED ENVIRONMENT
GORGEOUS NEW DESIGN...CLASSIC PERFORMANCE!

AVAILABLE IN

Single	(#39229)
4 Pack	(#39230)

FEATURES*

- Powered by ERT™ to help reinforce your body's natural resilience to the effects of everyday stress in your home, office, or when traveling
- Designed to cover up to a 60-foot radius
- Uses no electricity
- Easy and convenient. Plug into your wall outlet (for bio-energetic reasons, not for power) and you're ready to go!

DIRECTIONS FOR USE*

Plug the GIA Harmonizer into a centrally located wall socket or power strip in your home or office. The Harmonizer will cover up to a 60-foot radius from where you place it. For best results, use the GIA Harmonizer in rooms where you spend the majority of your time (e.g. bedroom, family room, office, etc.).

By energetically entraining its groundbreaking "Inspired Energy" products with the proprietary Energy Resonance Technology (ERT), GIA Wellness has revolutionized the way biofield-reinforcing frequencies are utilized by the body's energy field. Through ERT, the body's natural biofield strength is optimized to a level where you can truly thrive energetically, even in the most stressful environments.*

*"Between my wife, my kids, and I, our home is filled with wireless gadgets. Our family is sensitive to electromagnetic fields, but ever since we installed GIA Harmonizers throughout our home, everybody has felt a sense of relief, more energy and better sleep."**

J.J., Beaverton, OR

GORGEOUS NEW DESIGN...CLASSIC PERFORMANCE!

FREQUENTLY ASKED QUESTIONS*

How do I properly use the GIA Harmonizer?

Simply plug the GIA Harmonizer into a centrally located wall socket or power strip in your home or office.

What room/area should I plug the Harmonizer in?

The Harmonizer is designed to neutralize the stressing effects of the electric current in the circuit in which it is plugged into, thus we suggest plugging it into a centrally located socket or power strip. The Harmonizer has a balancing, yet invigorating effect, so if there is a room or office in which you spend a lot of time, we highly suggest using one designated Harmonizer for that specific room.

Does the 60-foot radius emanate in all directions? Can it go upstairs/downstairs?

The 60-foot radius is calculated in all directions. It is measured through ceilings, floors and walls between rooms. Considering individual living environments (wall thickness, layout of home, etc) may vary greatly, naturally the 60-foot radius may vary also.

Does the GIA Harmonizer use electricity?

No it does not.

If the Harmonizer is plugged into a certain room, do the electronic devices/machinery in the room still need GIA Universal Guards on them?

Yes, GIA recommends that you place Universal Guards on all the EMF-emitting devices in your home/office. While the GIA Harmonizer is designed to neutralize the stressing effects of the electrical currents that run through your home/office, the best intervention in counteracting the negative effects of EMF is to use the GIA Harmonizer and the Universal Guards together.

Does it matter which way the GIA Harmonizer is plugged in, logo facing up or logo facing down?

No, the GIA Harmonizer is effective when plugged in either way.

FEEDBACK & SUCCESS STORIES*

"I have two computers in my office and when I used to work at them, I could only sit for 15 minutes at a time. . . I used to feel so drained. When I plugged my GIA Harmonizer into my office wall, I noticed I did not have to get up as often. In fact, I have to force myself to take a break! I am less fatigued, less stressed, and so much more productive!"

D.K., Fairfield, CT

"I installed my GIA Harmonizer in my home office because it is centrally located upstairs and I have numerous EMF-emitting devices in the room. What surprised me was my dog's reaction. The upstairs of our home is off limits to the dog and that worked well, because he never liked to be in our office anyway - that is, until we installed the GIA Harmonizer. Within 24 hours, the dog paid an uninvited visit to the office, and now is a regular visitor. He even hesitates to leave when scolded! He has been attracted to that room ever since the product was installed. He demonstrates what we all feel - a desire to be in a calmer, less stressful environment."

C.P., San Diego, CA
