

gia[™] smart strips

FOR RELIEF FROM COMMON STRESS & DISCOMFORT

Thank you for your purchase of the GIA Smart Strip Set, powered by GIA's proprietary Energy Resonance Technology (ERT[™]). Please make sure to read ALL of the following instructions (front and back) to ensure proper use, as well as long term, repeat usability of your GIA Smart Strips.

Your Set contains 5 Smart Strips in 3 different sizes (3 circles, 1 band, and 1 large patch), to provide you with the appropriate sizes for your body's different needs. In addition to the information below, the back of this instructional sheet will walk you through the proper application of the Smart Strips on your body, as well as how to both remove and store them properly.

Each Smart Strip Consists of 3 Components:

1 The Transparent, Non-Removable Laminate
This laminate is designed to protect your Smart Strips fabric from dirt, grease, moisture, etc. When used/cared for as directed, it will remain affixed to the Smart Strip fabric.*

2 The Nude-Colored ERT-charged Fabric
The strip's fabric is the heart of the energetically functional component of your Smart Strips.*

3 The Temporary "EZ-Place" Adhesive
This medical-grade adhesive is designed to serve as a placement/positioning aid on your body. It allows you to temporarily place the Smart Strips on your body so that you're then able to securely adhere/affix them to your body with either skin-friendly adhesive tape, an ACE[™] bandage, wrap, gauze, band aids, etc (not included in Smart Strip Set). Please note that the temporary adhesive IS NOT designed to serve as the permanent way of keeping your Smart Strips adhered/affixed to your body.*

***WARNING: DO NOT ATTEMPT TO SEPARATE THE TRANSPARENT LAMINATE FROM THE SMART STRIP FABRIC. DO NOT ATTEMPT TO STRETCH, TEAR, CUT, OR ALTER THE PREDETERMINED SHAPE OF THE SMART STRIPS IN ANY WAY. ANY OF THE ABOVE WILL VOID YOUR PRODUCT WARRANTY.**

Cleaning Instructions:

Provided you use and handle your Smart Strips as directed, you should not have to clean them. If you desire to clean them anyway, please carefully mist GIA i-H2O on the laminate and gently wipe off any residue with a soft cloth or a paper towel. GIA i-H2O may also be used to gently clean the "EZ-Place" adhesive. Avoid wiping or rubbing the adhesive. Instead, after cleaning, allow the adhesive to air dry.

Following cleaning and drying, place each strip into its designated space inside the Smart Strip Set storage box until you're ready to use them again.

Important Recommendations & Disclaimers

Exposure to moisture may shorten the lifespan of your Smart Strip's temporary adhesive. Avoid showering, bathing, and partaking in strenuous exercise (perspiring) while wearing your GIA Smart Strips.

Avoid rubbing the bottom side of your Smart Strips. Doing so will inevitably damage the temporary adhesive and/or separate it from the Smart Strip fabric.

GIA recommends you DO NOT wear the Smart Strips on your body during sleep, as you may cause damage to the strip and/or temporary adhesive.

HOW TO APPLY THE GIA SMART STRIPS™

Step 1

At the upper right-hand corner (of the 1.9" x 6.5" band and large patch) and the upper right-hand edge (of the circles), gently slide the index finger of your right hand between the Smart Strip's adhesive and the white packaging surface. Now, while gently holding the corner of the Smart Strip between your thumb and your index finger, slowly pull the Smart Strip(s) towards you (away from the packaging). Now, gently remove the blue liner (triangle shape) from the Smart Strip(s).

CAUTION: Avoid sliding your thumbnail between the Smart Strip fabric and the adhesive itself, as doing so will tear the "EZ-Place" adhesive off the back of the Smart Strip material, permanently damaging it.

Step 2

Once your Smart Strip(s) have been removed from the packaging, gently apply the adhesive side to the desired area of your body. Once the Strip is positioned to your liking, gently press down and smooth out every part of the strip, ensuring there are no air-pockets.

Step 3:

To ensure your Smart Strip stays securely in place on your body, GIA strongly recommends you adhere/affix the Smart Strips using either skin-friendly adhesive tape, ACE™ bandage, wrap, gauze, band aids, etc. (not included in Smart Strip Set).

HOW TO REMOVE & STORE THE GIA SMART STRIPS™

Step 1

Once you have completed wearing the GIA Smart Strip(s), first remove any adhesive tape, ACE™ bandage, wrap, gauze, band aids, etc. that you used in order to securely adhere/affix them to your body. When done, gently slide your index finger between your skin and the edge of the Strip. Gently holding the edge between your thumb and index finger, slowly pull the Smart Strip upward and away from your body, ensuring that the "EZ-Place" adhesive does not separate from the Smart Strip fabric. Please note that the unique composition of the temporary, medical-grade adhesive has been designed to make the removal of your Smart Strips from your skin pain-free, to not pull out hair, nor to leave residue on your skin.

Step 2

Once the Smart Strip(s) have been removed from your body, gently place them – adhesive side down – back into their designated space(s) inside the Smart Strip Set box. Once the Strip is positioned in its designated space, gently press down and smooth out every part of the strip - in particular its edges - making sure that there are no air-pockets and the Strip tightly adheres to the box's white surface. GIA recommends you store your Smart Strip Set in a cool location to ensure the strips' adhesive, fabric and laminate do not overheat or dry out. Proper storage of the Smart Strips will extend their usability and life-span.

Step 3

While the gentle, medical-grade adhesive on the back of your Smart Strip(s) is designed to leave no residue on your skin, we suggest nonetheless that you clean the area where your Smart Strip was placed with i-H₂O (or another gentle skin cleanser). This will ensure optimal hygiene after extended Smart Strip usage.

Return Policy

While GIA Wellness takes pride in having a generous and legally-compliant product warranty and return policy on all its products, please note that GIA will not replace or exchange Smart Strips in any of the following events, all of which void product warranty:

- The "EZ-Place" adhesive has been damaged or separated from the Smart Strip fabric
- The protective laminate on top of the Smart Strip has been damaged or separated from the Smart Strip fabric
- Smart Strip(s) have been lost or misplaced

Proper application and storage of the Smart Strips will assure that you can enjoy their benefits for a long time. If you have any questions regarding the application, removal, and/or storage of your GIA Smart Strips, please feel free to contact our friendly VIP Consultant Support Team by calling (760) 448-2498.
